

**GJF**  
Manufacturers Of Quality  
Skips & Containers  
**GJF FABRICATIONS**

**MANUFACTURERS OF  
HIGH QUALITY SKIPS,  
CONTAINERS AND  
RECYCLING BANKS**

## PRODUCTS THAT ARE DESIGNED TO LAST

Each GJF product is carefully designed to meet the operating requirements and Health & Safety standards for that application.

GJF uses only prime grade mild steels, thereby ensuring consistent product quality and a long service life.

Appropriately robust steel gauges are specified for individual applications so as to avoid premature failure or wear.

## INVESTMENT IN LATEST PRECISION TECHNOLOGY

GJF has invested in latest manufacturing technology including, laser profile cutters, a CNC saw / drill line and robotic welding.

The high levels of quality achieved translate into better dimensional stability and less distortion for our products. By laser cutting our steel plate sharp edges are avoided.

## PAINTED, SIGN-WRITTEN AND READY TO GO

Sound quality control procedures ensure that products leave the factory in prime condition.

GJF Asset Numbers are welded onto all containers to facilitate product traceability and security.

All products pass through our custom-designed spray booths, receiving a durable finish consisting of primer and then a gloss enamel top coat of your choice.

Our in-house graphic design department is available to prepare and apply vinyl signage to your instructions, saving you the task of double-handling your containers to another supplier.

## EXCELLENT SERVICE

### Responsive and Flexible

GJF endeavours to provide a responsive, flexible and friendly service at all times.

If you are unsure of your requirement, we will be delighted to advise on the most cost-effective choice of containers to meet your particular needs.

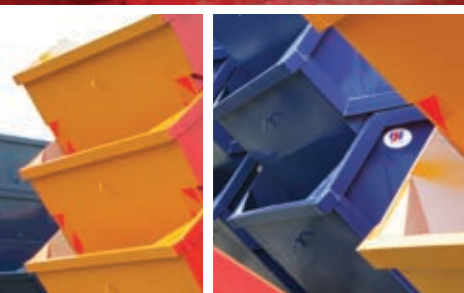

### Immediate Stock Availability

Investment in substantial finished stocks of skips and containers enables GJF to meet customers' requirements for rapid call-off and despatch. Please consult our web site for latest free stock availability.

### Delivery Service

A delivery service can be arranged, if required. We are able to deliver direct to your final destination and offload using a vehicle with Hiab crane facilities.

**All of which adds up to excellent value for money!**

## COMPREHENSIVE PRODUCT RANGE

All GJF products comply with relevant Container Handling Equipment Manufacturers' (CHEM) standards.

For more details on our product ranges and specifications please visit [www.gjffabrications.co.uk](http://www.gjffabrications.co.uk)

All GJF containers are produced from components that we manufacture in house using latest laser cutting technology and computer-controlled saws.

Skips are assembled in our automated welding unit using four robotic welding stations, which enables us to achieve high levels of weld consistency and dimensional accuracy.

For further details on what makes a good skip please visit:

[www.gjffabrications.co.uk/whatmakesagoodskip](http://www.gjffabrications.co.uk/whatmakesagoodskip)

### Refurbishment Service

All type of repairs can be undertaken such as the fitting of new doors and replacement of locks and hinges. Containers can be shot blasted, repainted and new signwriting applied. We should be pleased to quote on individual jobs.

### Open Skips

Capacity Range: 1.5 – 20 cu yds

### Enclosed Skips

Capacity Range: 3.5 – 20 cu yds

### Rear End Loaders

Capacity Range: 2.5 – 11 cu yds

### Front End Loaders

Capacity Range: 2 – 10 cu yds

### Hooklift / Cablelift Containers

Capacity Range: 10 – 60 cu yds

### Compaction Containers

Capacity Range: 14 – 50 cu yds

### Recycling Banks

For glass, paper, wood, metal, plastic, textiles, shoes, paint, batteries, plus others

### Minihooklift Containers

Capacity Range: 4 – 32 cu yds

### Fork Lift Tipping Skips

Capacity range: 0.5 – 4.8 cu yds

### Bespoke Containers

GJF can design and manufacture any type of skip or container to meet individual requirements.

## GJF FABRICATIONS LTD

Based in the West Midlands, GJF Fabrications was established in 1988. We manufacture a comprehensive range of high quality skips, containers and recycling banks for construction, waste management, recycling and other industries throughout the UK.

Our purpose is simply to design and manufacture the best possible products to meet our customers' requirements, making sure that all Health & Safety considerations are met. GJF products deliver a long and trouble-free working life and therefore represent excellent value for money.

GJF has made significant investment in latest manufacturing technology. We have a philosophy of continuous improvement in all facets of the business in order to further refine our products and services, and offset rising costs.
